Agrolab Sprouts Business in Delaware
Open House Scheduled Sept. 10

DOVER, Del. (Aug. 30, 2010) – The [Delaware Economic Development Office](#) applauds the successful commencement of commercial analytical services at AGROLAB, Delaware's only commercial soil lab.

AgroLab is an independent agricultural laboratory serving professional crop advisors, agricultural support businesses, farmers, golf courses, lawn care companies and home owners. Soil fertility analysis will be AgroLab's fundamental service followed by business growth including plant tissue analysis, water analysis and other agricultural analytical services. These services will be marketed to businesses located throughout the Delmarva Peninsula and will have opportunities to expand to the Mid Atlantic and East Coast regions. It is the mission of the AgroLab to provide reliable, responsive and independent analytical support to the agricultural industry and other soil fertility professionals.

Professionals from DEDO provided business consulting services to William Rohrer, president of Agrolab, as he was finalizing his business strategy and site selection for his laboratory.

"The build-out of this facility in Milford fills a critical need for agriculture in Delaware," said Alan Levin, director of DEDO. "The Agriculture industry continues to fuel Delaware's economy and create both farming and scientific jobs for the state."

Senator Tom Carper is scheduled to speak at the company's open house on Friday, Sept. 10, 2010 at 11:00 a.m. AgroLab is hosting additional open houses for the general public to visit their new lab on Sept. 8, 10 and 13 from 11:00 a.m. to 6:00 p.m.

About the Delaware Economic Development Office

The Delaware Economic Development Office is an executive state agency responsible for attracting new investors and businesses to the state, promoting the expansion of existing industry, assisting small and minority-owned businesses, promoting and developing tourism and creating new and improved employment opportunities for all citizens of the State.
